

SCHOOL OF MEDICINE  
VANDERBILT UNIVERSITY

The Powers & Brissova research group in the Vanderbilt Diabetes Center is seeking a postdoctoral fellows to study human pancreas and islet biology with a focus on gene expression and developmental biology of single cells. We are especially interested individuals with computational or informatics expertise, multimodal, multiplex imaging experience, or live cell imaging experience. Our collaborative research group is part of the Human islet Research Network. Send CV to [al.powers@vumc.org](mailto:al.powers@vumc.org).
