

Postdoctoral Scholar Positions in Microphysiological Systems (“Tissue Chips”) – Hughes Lab

An NIH-funded postdoctoral position is available to work on the development of body-on-chip devices in the areas of pancreatic islets (Type 1 diabetes). The ideal candidate will have experience in cell culture, vascular biology, bioengineering (including COMSOL modeling), and microfluidic systems. Prior knowledge in the areas of diabetes would be an advantage, however, candidates with any combination of the above should consider applying.

Initial appointment is for one year with an anticipated extension to 3 years pending satisfactory performance and funding. Salary will be commensurate with experience and University guidelines.

Qualified candidates should send curriculum vitae, a cover letter outlining research experience and interests, and the names, phone numbers and e-mail addresses of three references to the following on-line recruitment URL:
