

Vancouver, Canada

# Stem Cell Research Technician

Open until filled.

A new Stem Cell and Genome Editing Core Facility situated within the Kieffer Research Group has an opportunity for a highly motivated and collaborative technician to support diverse regenerative medicine research initiatives. The candidate will assist with the day-to-day operation of the Core, will generate human induced pluripotent cells (iPSCs), and will culture and differentiate human embryonic stem cells (ESCs) and iPSCs down pancreatic lineages.
