

### **Postdoctoral Fellow**

Interested in small-molecule discovery and modulating beta-cell phenotypes? The Wagner lab in the Chemical Biology & Therapeutics Science (CBTS) Program at the Broad Institute, is accepting applications for postdoctoral fellow positions. We are looking for researchers interested in studying small molecule-mediated beta-cell survival. Candidates should have a strong record of productivity and publication in islet biology or chemical biology. Interested applicants should send a letter/statement of interests, CV, and contact information for 2-3 references to [bwagner@broadinstitute.org](mailto:bwagner@broadinstitute.org).
