

## Postdoctoral Position

INDIANA  
BIOSCIENCES  
RESEARCH  
INSTITUTE

Indiana Biosciences Research Institute is offering Postdoctoral positions to study the protection of antigen-specific monoclonal antibodies and engineered T cells against type 1 diabetes, supported by federal and local fundings. Candidates must have Ph.D. and/or M.D. degrees in immunology, biology, or a related field. Candidates with expertise and skills in Immunology, autoimmune disease, and diabetes are strongly encouraged to apply. In this position, you will work in a collaborative and interdisciplinary team to study immune interventions using both animal models and human samples. Candidates will also be encouraged to develop their own research interests. Interested candidates should send their CV, cover letter, and contact information with 3 references to Dr. Li Zhang [lzhang@indianabiosciences.org](mailto:lzhang@indianabiosciences.org) or visit <https://www.indianabiosciences.org/careers>.
