

University of California
San Francisco

The Tang lab at UCSF is looking for a postdoctoral fellow to work on projects on improving beta cell replacement therapy by promoting beta-cell survival in ischemia and developing local immune modulation strategies to avoid systemic immunosuppression. The ideal candidate should have experience in type 1 diabetes research, knowledge of transplant immunology, animal modeling, and enthusiasm for novel therapeutic development. The Tang lab is located in the UCSF Diabetes Center among a group of highly collaborative labs with expertise in immunology, stem cell biology, and beta-cell biology (<https://diabetes.ucsf.edu/>). Please contact Qizhi.Tang@ucsf.edu for more information.
