The Ferreira laboratory at the Medical University of South Carolina (MUSC) and Hollings Cancer Center in Charleston, SC (http://www.ferreiralab.com) is seeking highly motivated and creative postdoctoral fellows interested in designing and developing engineered conventional and regulatory T cell therapies for autoimmune disease and cancer. Our research program is diverse, combining T cell biology, synthetic biology, and genome engineering approaches to study autoimmunity and cancer in immunocompetent and humanized mouse models of disease. Selected candidates will work in a collaborative and interdisciplinary team and will be encouraged to develop their own research interests. Candidates must have a PhD in biology, immunology, or a related field. Applicants for the position should send a CV, a brief statement of their research interests, and contact information for three references to Dr. Leonardo Ferreira at ferreirl@musc.edu.
