

Diabetes Center of Excellence

The Greiner and Brehm Labs at the UMass Chan Medical School's Diabetes Center of Excellence in Worcester, MA is recruiting a fully funded postdoctoral position. Their laboratories specialize in humanized mouse models to study type 1 diabetes. Interests include effector functions of human autoreactive T cells, interactions between T cells and beta cells, and identifying immune therapeutics that suppress beta cell destruction. Approaches used included immunological, cellular, molecular, and genomic. For more information, contact [Dr. Brehm](#) (michael.brehm@umassmed.edu)
