

Manager, Clinical Research

The University of Florida Diabetes Institute is looking for highly motivated and team-science minded individual with managerial experience, who will serve as the Operational Director of a

series of programs at the University of Florida that utilize tissues obtained from organ donors to address important research questions, largely but not exclusively related to diabetes, including its pathogenesis and disease-related complications.

The individual in this position will be involved in programmatic designs and is responsible for implementing the various strategic plans for each program and ensuring their success. Importantly, this individual will be responsible for monitoring grant budgets, negotiating numerous financial and legal contracts, preparing external reports, and supervising local administrative staff. Interested applicants please apply directly through the [UF Jobs](#) or send a cover letter and curriculum vitae, including the names of three references to [Dr. Mark Atkinson, Institute Director](#).
