

The Leuven Diabetes Lab is seeking an ambitious Principal Investigator with a strong background in immunology or beta-cell biology to join, and ultimately take over, leadership of the lab, currently headed by Prof. Chantal Mathieu and managed by Dr. Conny Gysemans. The lab's mission is to advance the understanding and treatment of type 1 diabetes through innovative research, spanning beta-cell preservation, immune modulation, and translational approaches.

As part of this position, candidates may be eligible for enhanced ERC funding, recently expanded to support top global researchers relocating to Europe, making this a unique opportunity for outstanding scientists from the US or other countries to establish a high-impact research program in a world-class environment. Join us in shaping the future of type 1 diabetes research and working toward a world without type 1 diabetes.

Interested candidates should send a CV and brief description of research interests to [Dr. Chantal Mathieu](#) and [Dr. Conny Gysemans](#).
