

### Postdoctoral Position

A postdoctoral scientist position is available in the laboratory of Dr. Remi Creusot at the Columbia Center for Translational Immunology. The research will focus primarily on funded projects utilizing mice with human immune system in which novel antigen-specific immunotherapies for T1D will be evaluated. This position offers a unique opportunity to work in a highly multidisciplinary environment interfacing immunology, diabetes and immuno-engineering. A successful candidate will have a recent PhD in Immunology or related field and will have some experience with flow cytometry, in vitro / ex vivo immunoassays, and animal procedures (including surgery). Inquire by sending an email to [rjc2150@cumc.columbia.edu](mailto:rjc2150@cumc.columbia.edu).
