Postdoctoral Fellow/Research Associate - Neuroscience and Diabetes.

Rutgers - Robert Wood Johnson Medical School

Rutgers, the State University of New Jersey, is seeking a Postdoctoral Fellow/Research Associate for the Child Health Institute of New Jersey at the Robert Wood Johnson Medical School. The position is available in El Ouaamari's group (http://elouaamari.org) to investigate the role of central and peripheral neurons in the regeneration and function of insulin-producing cells in the context of type 1 and type 2 diabetes.

Self-driven, creative and organized candidates with a PhD in neuroscience, biochemistry or molecular and cellular biology are encouraged to apply. The candidate must possess skills in manipulating and assessing neuronal activity. Prior experience working with rodents is required. Preference will be given to applicants who also have experience with pancreatic islets. Candidates should have a strong record of productivity and publication in the fields of neuroscience/neurobiology or islet biology. Proficiency in oral and written English is required. Salary will be commensurate with experience, and follow NIH and Rutgers guidelines.

This position comes with the opportunity to interact with a diverse faculty inside and outside of the Rutgers community. Successful candidate will grow in a highly translational environment employing a multi-disciplinary approach to tackle questions relevant to diabetes. Interested individuals should send CV, cover letter and names and details of 3 referees to abdelfattah.elouaamari@rutgers.edu
